Whitespace & Cross-Sell Opportunity Analyzer

User Guide for Sales & Sales Management

Q3 2026

Jeff Dillon, Helen Lan

SAP Confidential

What Is This Tool?

Whitespace & Cross-Sell Opportunity Analyzer

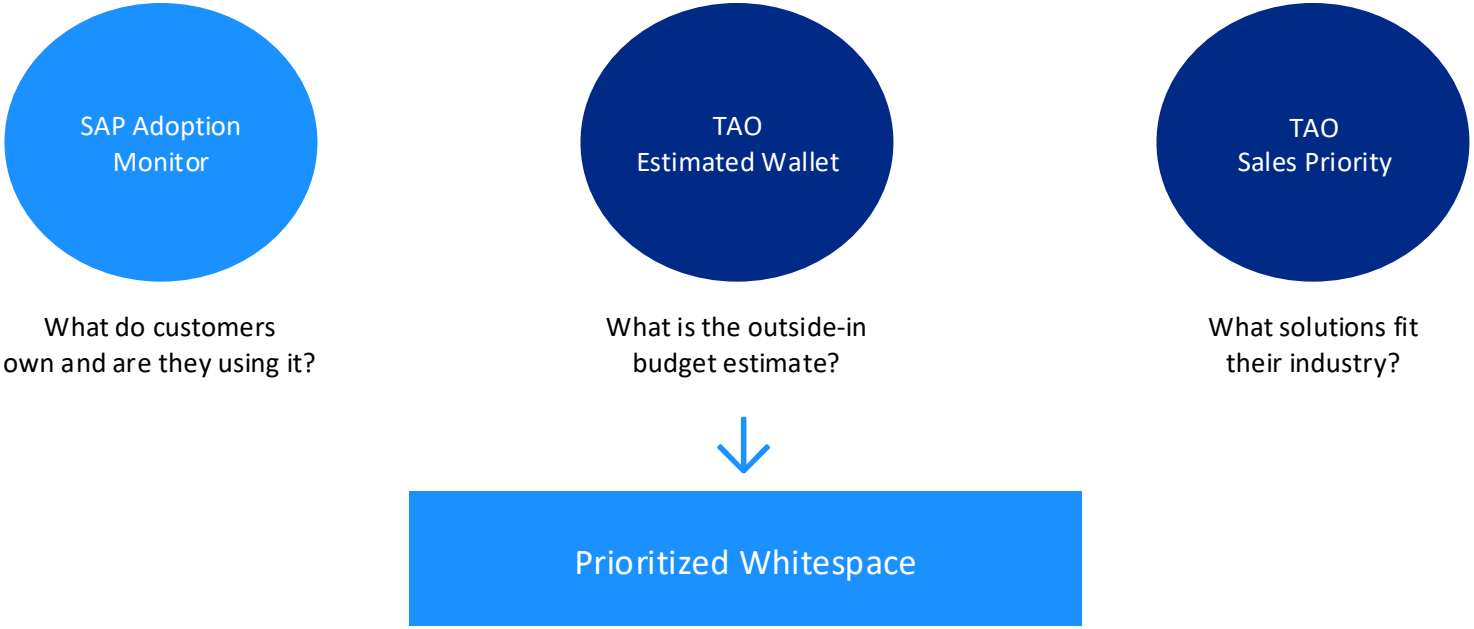

- Looks at every account you own and asks: "Which SAP Solution Areas do they NOT have yet?" NOT have yet?"
- Ranks those gaps by outside-in dollar potential (how much budget likely exists, based on peers in the same industry and revenue tier)
- Tells you which accounts to call first, which products to propose, and how much opportunity is at stake

"Find the money you're leaving on the table — before your competitor does."

SAP Confidential

How the Tool Works

"Three inputs → one prioritized opportunity list"

SAP Confidential

Key Concepts

TAO Estimated Wallet

Approximates how much budget exists for a specific solution area (L1, L2).

Gap to Estimated Wallet

Estimated Wallet - Exit ACV - CY & CY+1 Pipeline

Estimated Wallet Data Inputs

- Average 2025 Total SAP Revenue per solution area for top k% companies in each Global Ultimate Revenue Band cluster.
- CRO alignment and market intelligence informed additional assumptions on total opportunity sizing

SAP Confidential

Key Concepts

TAO Priority

The likelihood that a sales opportunity will open for this account in a specific solution area (L1,L2) within the next year, based on historical patterns.

Priority	Account coverage	Future opps
1 Very High	Top 5%	~40%
2 High		
3 Medium	Next 20%	~40%
4 Medium Low	Bottom 75%	~20%
5 Low		

SPS Model Data Inputs

- Super Score (intent data)
- BTP Recommender (usage data)
- Propensity Model (opportunity data)
- Customer Journey (purchase history)
- Crystal Record (CRM master data)

Account Detail Page

"Everything you need to prepare a cross-sell conversation — in one view"

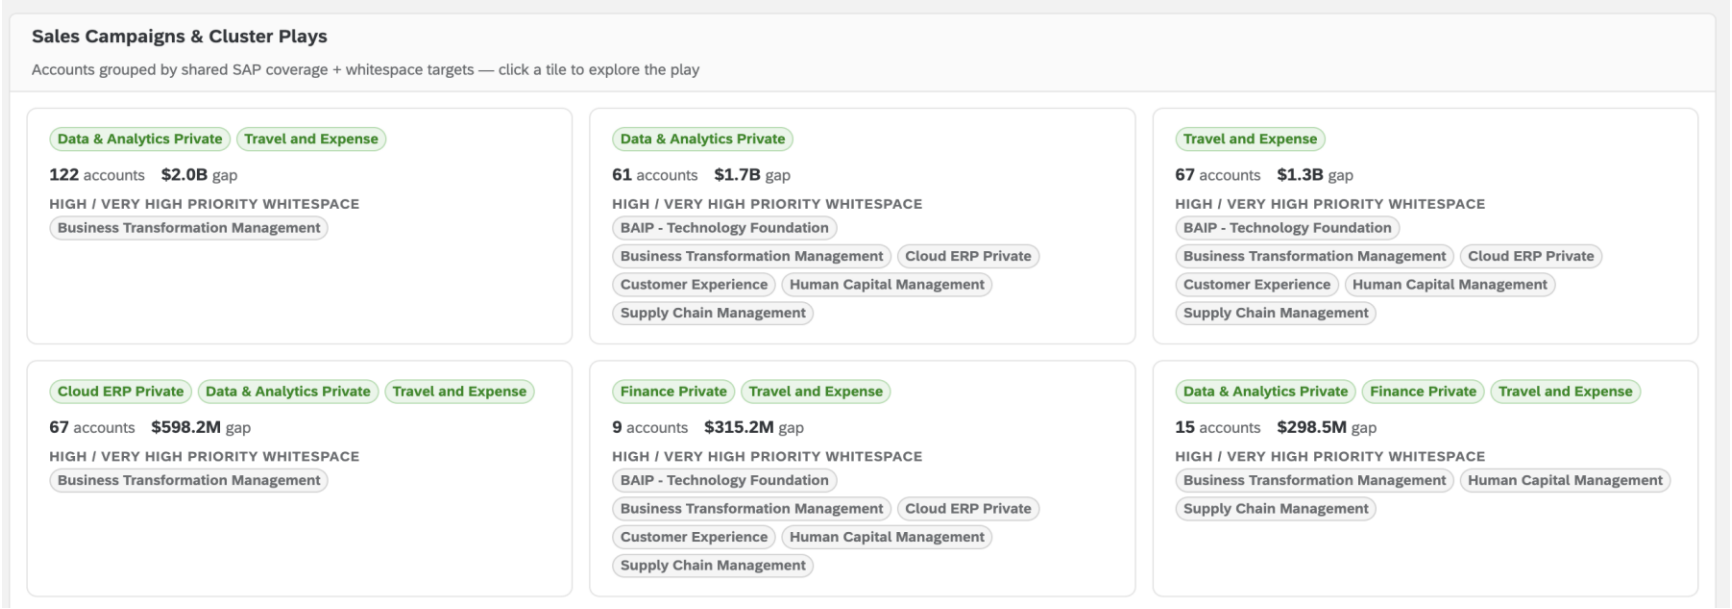

Before your next discovery call: note the top 2–3 whitespace Solution Areas by Gap, check the Recommended Solutions, and go in with a hypothesis.

SAP Confidential

Cluster Analysis

"Run the same play on dozens of accounts at once"

Portfolio leads: use clusters to build focused campaigns. Sales managers: coordinate multi-AE outreach across a shared play.

SAP Confidential

Tips & Gotchas

- Filters are global — Sales Office, Sales Group, Solution Area, Industry, RISE, Strategy, and Priority filters apply filters apply everywhere.
- Scope mode — "Planning Entity + Top Parent" nulls out whitespace for L1s already covered by the parent. Avoids proposing what the parent owns.
- Heatmap shading is intentionally inverted for accounts — lighter = more accounts (more opportunity volume).
- Accounts with no SAP products are filtered out (tool is for cross-sell, not new logo).
- Shelfware ≠ whitespace — if they have a license they're not using, it's covered. Consider a re-adoption conversation.
- Data is at Planning Entity level — always check Top Parent. Switch to PE + Top Parent scope to factor in parent ownership.
- Account search (top right) lets you jump directly to any account by name.
